

The Virtual Classroom Toolbox: The Group Browser

The Group Browser opens a web site that is viewable by all users. The URLs used in the session will be recorded in the archive if an archive is created.

The screenshot displays the Blackboard (Bb) interface. At the top, there are navigation buttons for 'View', 'Clear', and 'Breakouts', and the text 'Lecture Hall (Stu)'. Below this is a 'Classroom Tool' menu with options: 'Course Map', 'Whiteboard', 'Group Browser' (highlighted with a blue bar and an arrow), 'Ask Question', and 'Question Inbox (2)'. Below the menu is the 'Group Browser' section, which includes a 'URL' label, an 'Enter Address:' field containing 'www.oaklandcc.edu', a 'Display To Class' dropdown menu, and a 'Go!' button. An orange arrow points from the 'Group Browser' menu item to the 'Displayed web site' area. The 'Displayed web site' area shows the Oakland Community College (OCC) website, featuring a green header with the 'OAK' logo, a 'Campuses' section, and a list of links: 'About OCC', 'Future Students', 'Current Students', 'Business & Community', 'Employment at OCC', and 'Current News'. A 'Summer' section is also visible on the right side of the page.
