

Notes on checking your grades:

Grades will be available immediately if the quiz was taken online in Blackboard unless your instructor has chosen to make the grades unavailable.

If the quiz was taken in the classroom, grades will not be in Blackboard until your instructor has manually entered the grades. Your instructor might not enter grades for all quizzes.

If you see a red exclamation point **!** instead of a score, your quiz needs grading.

If you see a red question mark **?** instead of a grade, there is some sort of grading error with your quiz.

Helpful Hint: Contact your instructor with any questions about your grades.
