

Concrete Construction Manager Program Assessment Plan

Last Revised 5/11/2009

Catalog Description

This option is intended for individuals that desire a career in concrete construction management. Course work will emphasize concrete technology. Upon completion of CCM 1500, CCM 2000 and CCM 2500, the student will be prepared to take the State of Michigan Concrete Testing Technician certification exam Levels I and II. Successful completion of this option will result in a Certificate of Achievement in Construction Marketing. The student may choose to continue and complete an Associate in Applied Science Degree in Construction Management or a Certificate in Concrete Construction Management.

Concrete Construction Manager Program Assessment Plan
