

# Beginner's Guide to *BETTER* Photography

## **Beginner's Guide to Better Photography LEVEL 1**

Bring your camera and the box of goodies that it came with and spend a day learning how to improve your snapshots. See how a few simple changes to your technique and composition will turn photos into keepsakes that will impress you and all those who look at your work. You will take before and after photos to see the impact of your new style. This class is geared towards the casual photographer; designed to improve basic photography skills. In addition to your camera and manual bring in a card reader or USB cable.

**Registration Code:**  
**PRSN-1042-T0813**  
**Saturday,**  
**October 5, 2019**  
**8 am - 5 pm**  
**Auburn Hills Campus,**  
**M-TEC Building**  
**Room: 235**  
**Cost: \$89.00**

## **Beginner's Guide to Better Photography LEVEL 2**

Explore 4 distinct areas of photography. The hands on approach to these concepts will provide students with a better understanding with the use of special mode settings and procedures associated with digital cameras and the importance of lighting. Introduction of flawless subject posing using available light or electronic flash will improve the look of your photos. Explore the best settings for sport activities, night scenes, and indoor/outdoor gatherings. Learn the capabilities and limitations of your camera such as zoom lens, wide angles, and telephoto settings. Manage after-market accessories, and improving the look of your photos with basic editing software. Participants will have time to assess their work and ask follow up questions.

*Note: A basic knowledge of your digital camera and photography is recommended.*
