## ACLS PROVIDER

### COURSE DESCRIPTION:

This course will provide the student with instruction in Advanced Cardiac Life Support. Through the ACLS course, providers will enhance their skills in the treatment of the adult victim of a cardiac arrest or other cardiopulmonary emergencies. ACLS emphasizes the importance of basic life support CPR to patient survival, the integration of effective basic life support with advanced cardiovascular life support interventions, and the importance of effective team interaction and communication during resuscitation. Each student will receive EKG interpretation, didactic, and case based scenarios within an interactive learning environment but at a slower and more defined pace than traditional ACLS classes. Successful completion of the course will result in certification in ACLS for 2 years through the American Heart Association.

### REALISTIC SIMULATIONS REINFORCE THE FOLLOWING KEY CONCEPTS:

- Proficiency in Basic Life Support care
- Recognizing and initiating early management of pre-arrest conditions
- Managing cardiac arrest
- Identifying and treating ischemic chest pain and acute coronary syndromes
- Recognizing other life-threatening clinical situations (such as stroke) and providing initial care
- ACLS algorithms
- Effective resuscitation team dynamics.
